

"If You Could Build A Safer, Faster, Better Performing Field, Why Wouldn't You?"

Just ask Murlan "Mo" Fowell, V.P. of Operations for the San Francisco 49ers. When he was looking for the best artificial turf field for their practice facility, he heard about Brock Performance Base.™

He said, "One of our biggest concerns about the new field was the overall impact consequences to our players. During discussions regarding the field's sub surface, we learned about Brock Performance Base and the rest is history. We ended up with an amazing field that is fast, safe, low impact and drains unbelievably well. To top it off, we gained environmental savings, too. *Brock is the only way to go.*"

It's Simply The Best Field Money Can Buy.

Don't just take our word for it. Brock Performance Base has undergone dozens of independent tests—and the results are impressive. With Brock, you'll get a field that stands up to blazing heat, extreme cold and decades of tough, on-field activity. If you want the best performing field for your athletes, do what the 49ers did. Give us a call.
